

CLINICIAN BENEFITS

TruDerm utilizes quantitative Real-Time Polymerase Chain Reaction (qPCR) to rapidly analyze your patient's sample in 24 hours. RT-PCR technology precisely detects the correct pathogen(s) and identifies antibiotic drug resistance. This allows providers the ability to prescribe timely and effective treatment.

THE VERO DX DIFFERENCE

- Detects polymicrobial infections
- PharmD interpretation
- Easy ordering platform
- Integrates with your EMR/ EHR
- Aids in antibiotic stewardship
- Unaffected by concurrent antibiotic use

BACTERIUM

- * *Enterobacter aerogenes*
- * *Enterobacter cloacae*
- * *Klebsiella pneumoniae*
- * *Klebsiella oxytoca*
- * *Enterococcus (faecalis, faecium)*
- * *Enteroccus faecium*
- * *Mycobacterium tuberculosis*
- * *Pseudomonas aeruginosa*
- * *Proteus vulgaris*
- * *Staphylococcus aureus*
- * *Streptococcus pyogenes*
- * *Actinomyces israelii*
- * *Propionibacterium acnes*
(*Cutibacterium acnes*)
- * *Human herpesvirus 3*
- * *Human herpesvirus 1*
- * *Human herpesvirus 2*

PARASITIC

- * *Sarcopetes scabiei*
- * *Leishmania sp*

48h

Accurate diagnosis
as soon as 48 hours

FUNGAL

- * *Acremonium strictum*
- * *Acremonium strictum*
- * *Alternaria*
- * *Aspergillus fumigatus*
- * *Aspergillus niger*
- * *Aspergillus terreus*
- * *Aspergillus versicolor*
- * *Blastomycses dermatitidis*
- * *Candida albicans*
- * *Candida tropicalis*
- * *Candida parapsilosis*
- * *Epidermophyton floccosum*
- * *Fusarium solani*
- * *Fusarium oxysporum*
- * *Microsporum sp. (ferrugineum, audouinii, canis)*
- * *Scopulariopsis brevicaulis*
- * *Trichophyton rubrum*
- * *Trichophyton violaceum*
- * *Trichophyton soudanense*
- * *Trichophyton tonsurans*
- * *Trichopyton interdigitale*
- * *Cryptococcus neoformans*

ANTIBIOTIC

RESISTANCE GENES

- * Class A beta lactamase CTX-M1 (15), M2 (2), M9 (9), M8/25
- * Class A beta lactamase SHV, KPC Groups
- * Class B metallo beta lactamase IMP, NDM, VIM Groups
- * Class D oxacillinase OXA-48, -51
- * Extended Spectrum Beta lactamases Resistance Gene TEM G236S
- * Fluroquinolone Resistance Genes qnrA1, qnrA2, qnrB (qnrS)
- * Macrolide Lincosamide Streptogramin Resistance ermB, ermC, ermA
- * Methicillin Resistance Gene mecA
- * Tetracycline Resistance Gens tetB, tetM Trimethoprim/Sulfamethoxazole
- * Resistance dfr(A1,A5), sul(1,2)
- * Vancomycin Resistance Genes VanA, VanB

Sample Type: Clippings

PATHOGENS DETECTED

Organism	Estimates Copies/mL	Estimated Mic. Load
Aspergillus niger		Low

RESISTANCE GENES DETECTED

ErmC

These genes are associated with potential resistance to Macrolides, Lincosamides, and Streptogramin B antibiotics such as azithromycin, erythromycin, and clindamycin

ATA CHOICE™

Medication Review

Category	Medication	Route	Dose	Consideration
First Line	Itraconazole	PO	200mg bid x1 week per month for 3-6 months for toenails	Obtain baseline LFTs. Check drug interactions. Black Box for CHF. Take capsule with food and acidic beverage. Avoid PPI or H2 blockers. Avoid grapefruit juice.
Alternative	Terbinafine	PO	250mg bid x7 days then off for 21 days x3-6 months for toenails	Contraindicated in chronic or active hepatic disease, get baseline LFTs before tx begins, monitor CrCl and CrCl<50 adjust dose. check drug-drug interactions.
Alternative	Voriconazole	TOP	Apply to affected nails bid x12 weeks or until new nail grows clear	Adults weighing less than 40kg reduce maint. dose 50%, Adjust dose with renal or hepatic impairment. Take on empty stomach, avoid high fat food, Infuse IV over 1-2 hrs, not to exceed 3mg/kg/hr, May cause visual disturbances, Monitor for electrolyte disturbances.
